Jeff,

I absolutely loved your presentation you recently gave at the FMS MGMA annual conference in San Diego. As business leaders, we are all expected to eat, sleep, live, and breathe the daily crisis at the organizations for which we work. I do not know when this became the norm for our society, but there is definitely a need for a balance. Your presentation and your hand out provide the first steps and a "plan" for accomplishing just that. Please send me a copy of your live-recording on having more Breathing Space. I am so glad I was able to attend this presentation, and look forward to hearing you speak again in the future!

Sincerely,

April Broussard Millet, CPA, MBA  
Chief Financial Officer
