Dear Mr. Davidson,

I wanted to drop you a short note to thank you for the intriguing presentation you gave at the AENC meeting on Friday November 10, 1995. I have to say that I went away thinking of life with a different perspective.

I think the aspect of your presentation that I enjoyed the most was that you focused on just how long each of us are expected to live! So many times people seem to focus on how short life is and how this world is going to heck that I think most people don't realize how long they really will live. I have a friend who is 27 years old and she always says that she never thought she would live to be 27! Just think how long she has to go!!!

Your presentation, coupled with the serious illness of a close family member, really make it hit home how important it is to live each day to the fullest AND take time to smell the roses!!

In closing, I would just like to thank you for your "fresh" outlook on the future. I took a new route to work this morning AND didn't turn on the radio!!!

Kind regards,
