Dear Jeff:

I recently attended the NRECA Executive Secretary's Conference in Nashville and heard you speak. I was quite impressed with your presentations and found some of the facts you presented astounding.

I brought back different views on certain matters after hearing you. I have taken steps in my life, both at work and at home, to make some changes. I now give much consideration to those "mega-realities" and how they affect our lives. And, yes, I have made some changes because of these.

It was a real pleasure and most interesting being able to hear you speak. If I knew that you were going to be anywhere near my area speaking, I would make an effort to attend.

Thank you,

Linda Dunlap
